Below are my comments on this paper:

- Please discuss the research gaps better in the Introduction section. I cannot find the research gaps explicitly in the Introduction section.

- Section II. B is still in Bahasa (Model Adopsi Teknologi Informasi)

- The justification of the proposed model is very weak. TOE is a generic framework. Please discuss the proposed model within your research context (SMSE). The discussion should be deep enough as it will be becoming your main contributions.

- Please discuss the limitation of your study.

Here are my comments to improve the paper:

1. Do the authors think Figure 1 can be read by the readers? If not, why put it in the text?
2. Isn't recreating Figure 2 easier instead of cropping and pasting it from another paper? It makes it clearer to the readers.
3. TOE has been long recognized and widely used in IS stream. Please conduct a literature review work and define the motive and contribution of your paper.
